COMPANY OVERVIEW

Who We Are

Delhi-based cloud consultancy. 10+ years. 1,000+ projects. Zero compromise.

10+
Years

1000+
Projects

180
Experts

99.9%
Uptime SLA

Cloud Services

Full-stack cloud architecture on AWS, Azure & GCP. Design, deploy, manage.

AWS Automation

AWS Systems Manager, Lambda, and Terraform-powered IaC for zero-touch ops.

Infrastructure Security

Zero-trust policies, compliance frameworks, proactive threat monitoring.

DevOps & CI/CD

Git-driven pipelines, Kubernetes orchestration, container strategy.

Digital Transformation

Legacy modernization, microservices, cloud-native architecture.

Cost Optimization

FinOps framework. Guaranteed 30–40% infra cost reduction.

DESIGN SYSTEM

Color Palette & Visual Language

Every pixel engineered for premium SaaS experience.

BACKGROUNDS

#0D1117	#121212	#161B22	#1F2833
Primary BG	Rich Black	Card Surface	Lifted Surface

PRIMARY ACCENTS

#BB86FC	#58A6FF
Violet Glow	Electric Blue

SECONDARY ACCENTS

#03DAC6	#66FCF1
Teal Pulse	Cyber Cyan

TEXT & UI

#E0E0E0	#C9D1D9	#8B949E	#3FB950
Primary Text	Secondary Text	Muted / Caption	Success / Live

Interface Mode

Theme toggle for premium UX

Dark | Light

- Reduced Eye Strain
- Premium Branding
- Dev-Friendly
- Better UX

REAL-WORLD REFERENCES

Inspired by Industry Leaders

Three benchmarks that define premium SaaS & cloud UI design.

```
aws ec2 describe-instances

InstanceId: i-0abc1234
State: running  ✓
Type: t3.medium
```

AWS Console

DARK CONSOLE DASHBOARDS

AWS Management Console uses deep navy backgrounds, electric blue accents, and high-contrast data-dense UIs for infrastructure monitoring.

- Dark #1B1F23 base
- Blue #0073BB accent
- Data-rich panels
- Monospace fonts

Hostinger

Build Your Website

Get Started

Hostinger

CLEAN UI + STRONG ACCENTS

Hostinger pairs clean white surfaces with vivid purple accents — proof that bold color pops without sacrificing clarity.

- High contrast CTAs
- Purple #7743DB accent
- Smooth gradients
- Minimal padding

● xammer / cloud-automation

GitHub

DARK / LIGHT MODE TOGGLE

GitHub's dual-mode system — built on CSS variables — delivers seamless switching between Dimmed, High Contrast, and Light themes.

- Token-based theming
- Green #3FB950 accent
- Adaptive icons
- WCAG AA compliant

IMPLEMENTATION CONCEPT

Color System Architecture

How design tokens, CSS variables, and theme toggling work together.

01

Design Tokens

Named color values defined once: --violet, --bg-primary, --text-primary

02

CSS Variables

Tokens mapped to semantic roles. Context-aware values per theme layer.

03

Theme Toggle

A single class swap on <html>. All variables cascade instantly across every component.

04

Live UI Update

Zero reload. Smooth transition animations on all surfaces, text and accents.

Why it matters for Xammer

- Instant switching
- Accessibility-first
- System preference sync
- Single source of truth
- No layout shift

WEBSITE UI VISION

Xammer.in — Reimagined

Glassmorphism · Gradient Accents · Glowing CTAs

Homepage Hero

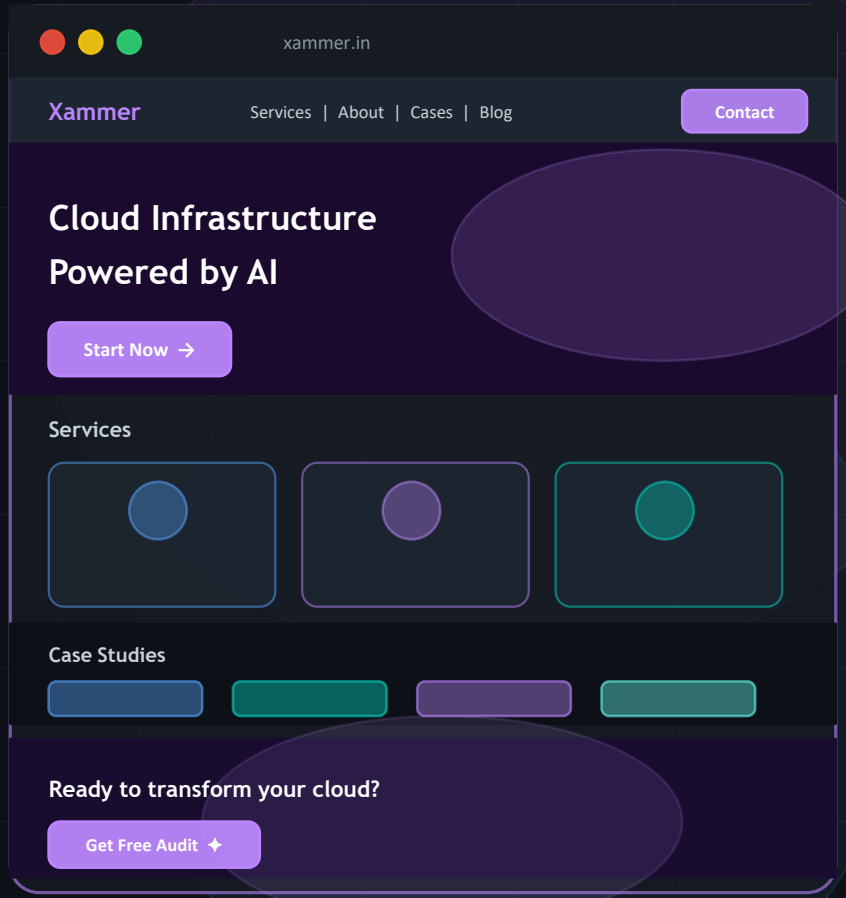
Full-width gradient, animated network mesh, headline + glow CTA

Services Grid

Glassmorphism cards with accent borders and hover glow effects

Case Studies

Dark timeline with client logos, before/after metrics panel

CTA Section


Full-bleed violet gradient, pulsing button, trust badges
